**JETRION INTRODUCES INDUSTRY'S FIRST
LOW-VOC SOLVENT INKS FOR CIJ PRINTERS**

**Enables Commercial and Mailing Printers
to Reduce VOC Levels, Expand Production**

ANN ARBOR, MI – September 11, 2005 – Jetrion LLC, a leading supplier of inkjet printers, inks and custom systems, has introduced the industry's first low-VOC solvent inks for continuous inkjet printers, enabling commercial printers to significantly reduce VOC levels in bindery and pressroom environments.

In actual pre-launch runs at production sites around the country, Jetrion's low-VOC inks ran at top bindery speeds in Domino[®] and VideoJet[®] CIJ printers, delivering trouble-free performance and quality that equaled or surpassed the results of MEK-based inks.

With substantially lower ambient VOC levels in their plants, companies using Jetrion's low-VOC inks in their BitJet[®], JetArray[®], PrintPro[®], and BX[®] printers immediately gain the ability to expand production operations within their facilities and still remain within stringent VOC emissions limits. Developed to provide high reliability and performance, Jetrion's low-VOC inks for continuous inkjet printers are positioned at a price point typically lower than printer OEMs.

MORE...

Dr. Ken Stack, president of Jetrion, points out, "Jetrion's low-VOC inks remove a major obstacle to growth faced by many commercial printers. The inks significantly cut VOC levels in binderies and pressrooms, and open opportunities to expand production capacity within a plant facility without exceeding VOC level mandates. For operations now pressing against their VOC limit, Jetrion's low-VOC inks offer an immediate solution for their problem."

During Print 05, Jetrion is demonstrating its new low-VOC inks running at full operational bindery speeds, printing on glossy stocks typically used in magazine and catalog production.

Jetrion's low-VOC inks are available now. Printers and mailers interesting in testing the low-VOC inks can call Dean Haertel at 734-622-6268 to request an ink trial.

About Jetrion LLC

A wholly-owned subsidiary of Flint Ink, Jetrion LLC provides a complete spectrum of industrial inkjet products, services and custom high-performance integration solutions to the printing, converting, packaging and direct mail industries. For more information about Jetrion, contact Jason Oliver, director of marketing and new business development, at 734-622-6650 or info@jetrion.com. Jetrion is on the Web at www.jetrion.com.

About Flint Ink

Founded in 1920, Flint Ink Corporation offers a comprehensive range of flexographic, sheetfed, web offset, gravure, UV/EB curable, digital, and advanced and conductive inks. Operations are organized into eight segments: North America, Latin America, Asia, India/Pacific, Flint-Schmidt in Europe, Jetrion LLC, Precisia LLC, and CDR Pigments & Dispersions. For additional information on Flint Ink's products and services, contact Rita Conrad, vice president of Corporate Communications, Flint Ink, at 734-622-6362 or rita.conrad@flintink.com. Flint Ink is on the Web at www.flintink.com.
